---

Ms Rychetsky,

Thanks for your support. The council has led the way in this effort, but now those who are supportive will have to work to get the vote out on November 3 because the opposition will be working hard to repeal it on that date. I will be doing my best to preserve it, but it will be a tough fight.

Best wishes

John Crompton

Dear Mayor White & Members of City Council,

I just wanted to express my support for the City's Red Light Cameras. As a mother of young children, I feel that these red light cameras are making our city streets a safer place to drive. It is making citizens more aware of their driving habits, & hopefully, deterring more risky driving behaviors such as driving too fast or running red lights. Especially since our city has such a large surge of young drivers (with each new semester) that take more risks on our roads; my hope is that the red light cameras are helping our citizens pay better attention while driving & therefore lowering our rates of car accidents & the like.

Thank you for listening to my "voice". I know that I am not the only person in this city that feels that the red light cameras are increasing our safety.

Sincerely,

Mary Rychetsky

College Station, TX
